

Video Optic Cine Audio Systems

The Vocas MB-2 series matteboxes.

Vocas proudly presents the most exciting advance in image control and light-management for DV camera's, the DV matte boxes MB-200 and MB-250. Packed with features that protect your camera and enhance your creativity.

These DV matteboxes can be attached in two ways to your camera:

1-Clip-on

For ultra compact and lightweight use the mattebox attaches directly (with the quick lock attachment) to the front of the camera lens.

2-On 15mm rail support

For best protection of camera and optimal compatibility with other accessories, such as follow focus.

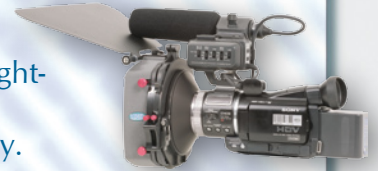

The Vocas DV matteboxes are ideal for use with Century DV accessories up to 105mm in diameter, and is fully compatible with popular glass filters, (3"x3" through 4"x6" in size) such as those from Schneider Optics.

The DV matteboxes features:

- One fixed and one rotatable 4"x4" filter frame.
- Patented adjustable internal eyebrows for maximum flare reduction.
- Accessory shoe for light or microphone (MB-200).
- Quick lock mounting system.

The **MB-200** is more compact and suitable for compact camera's.

The **MB-250** is larger and suitable for mid size DV camera's with or without wide angle attachment, up to 105MM lens front diameter.
